le VIH et l'hépatite C

## Reaching the Undiagnosed Webinar Series

As part of a national effort to reach Canadians living with undiagnosed HIV, hepatitis C and other sexually transmitted infections, the National Collaborating Centre for Infectious Diseases (NCCID), CATIE, and the CIHR Centre for REACH 2.0 joined forces to share promising practices for improved testing and linkage services in Canada.

### About the webinar series

Testing and linkage services are a gateway to prevention, treatment and care. These services are also a part of an effective strategy to address HIV, hepatitis C and other STIs in Canada. To further improve our efforts to reach the right people, at the right time, at the right place, with the most effective testing programs, we need to explore innovative ways to expand testing opportunities for those who would most benefit and those who have been left behind by existing strategies.

Series:

### ***Reaching the Undiagnosed: HIV and HCV Point-of-Care Testing in Canada - technologies and community programs***

#### *Speakers*

- Geneviève Boily-Larouche, NCCID
- Wangari Tharao, Women's Health in Women's Hands, Toronto, ON
- Lesley Gallagher, HCV Pop-Up Testing Clinics, Vancouver Coastal Health, Vancouver, BC

## Disclaimer

Decisions about particular medical treatments should always be made in consultation with a qualified medical practitioner knowledgeable about HIV- and hepatitis C-related illness and the treatments in question.

CATIE provides information resources to help people living with HIV and/or hepatitis C who wish to manage their own health care in partnership with their care providers. Information accessed through or published or provided by CATIE, however, is not to be considered medical advice. We do not recommend or advocate particular treatments and we urge users to consult as broad a range of sources as possible. We strongly urge users to consult with a qualified medical practitioner prior to undertaking any decision, use or action of a medical nature.

CATIE endeavours to provide the most up-to-date and accurate information at the time of publication. However, information changes and users are encouraged to ensure they have the most current information. Users relying solely on this information do so entirely at their own risk. Neither CATIE nor any of its partners or funders, nor any of their employees, directors, officers or volunteers may be held liable for damages of any kind that may result from the use or misuse of any such information. Any opinions expressed herein or in any article or publication accessed or published or provided by CATIE may not reflect the policies or opinions of CATIE or any partners or funders.

Information on safer drug use is presented as a public health service to help people make healthier choices to reduce the spread of HIV, viral hepatitis and other infections. It is not intended to encourage or promote the use or possession of illegal drugs.
