

# CANADA'S PROGRESS ON 90-90-90 TARGETS

Canada has committed to meet global targets for HIV testing and treatment by 2020.

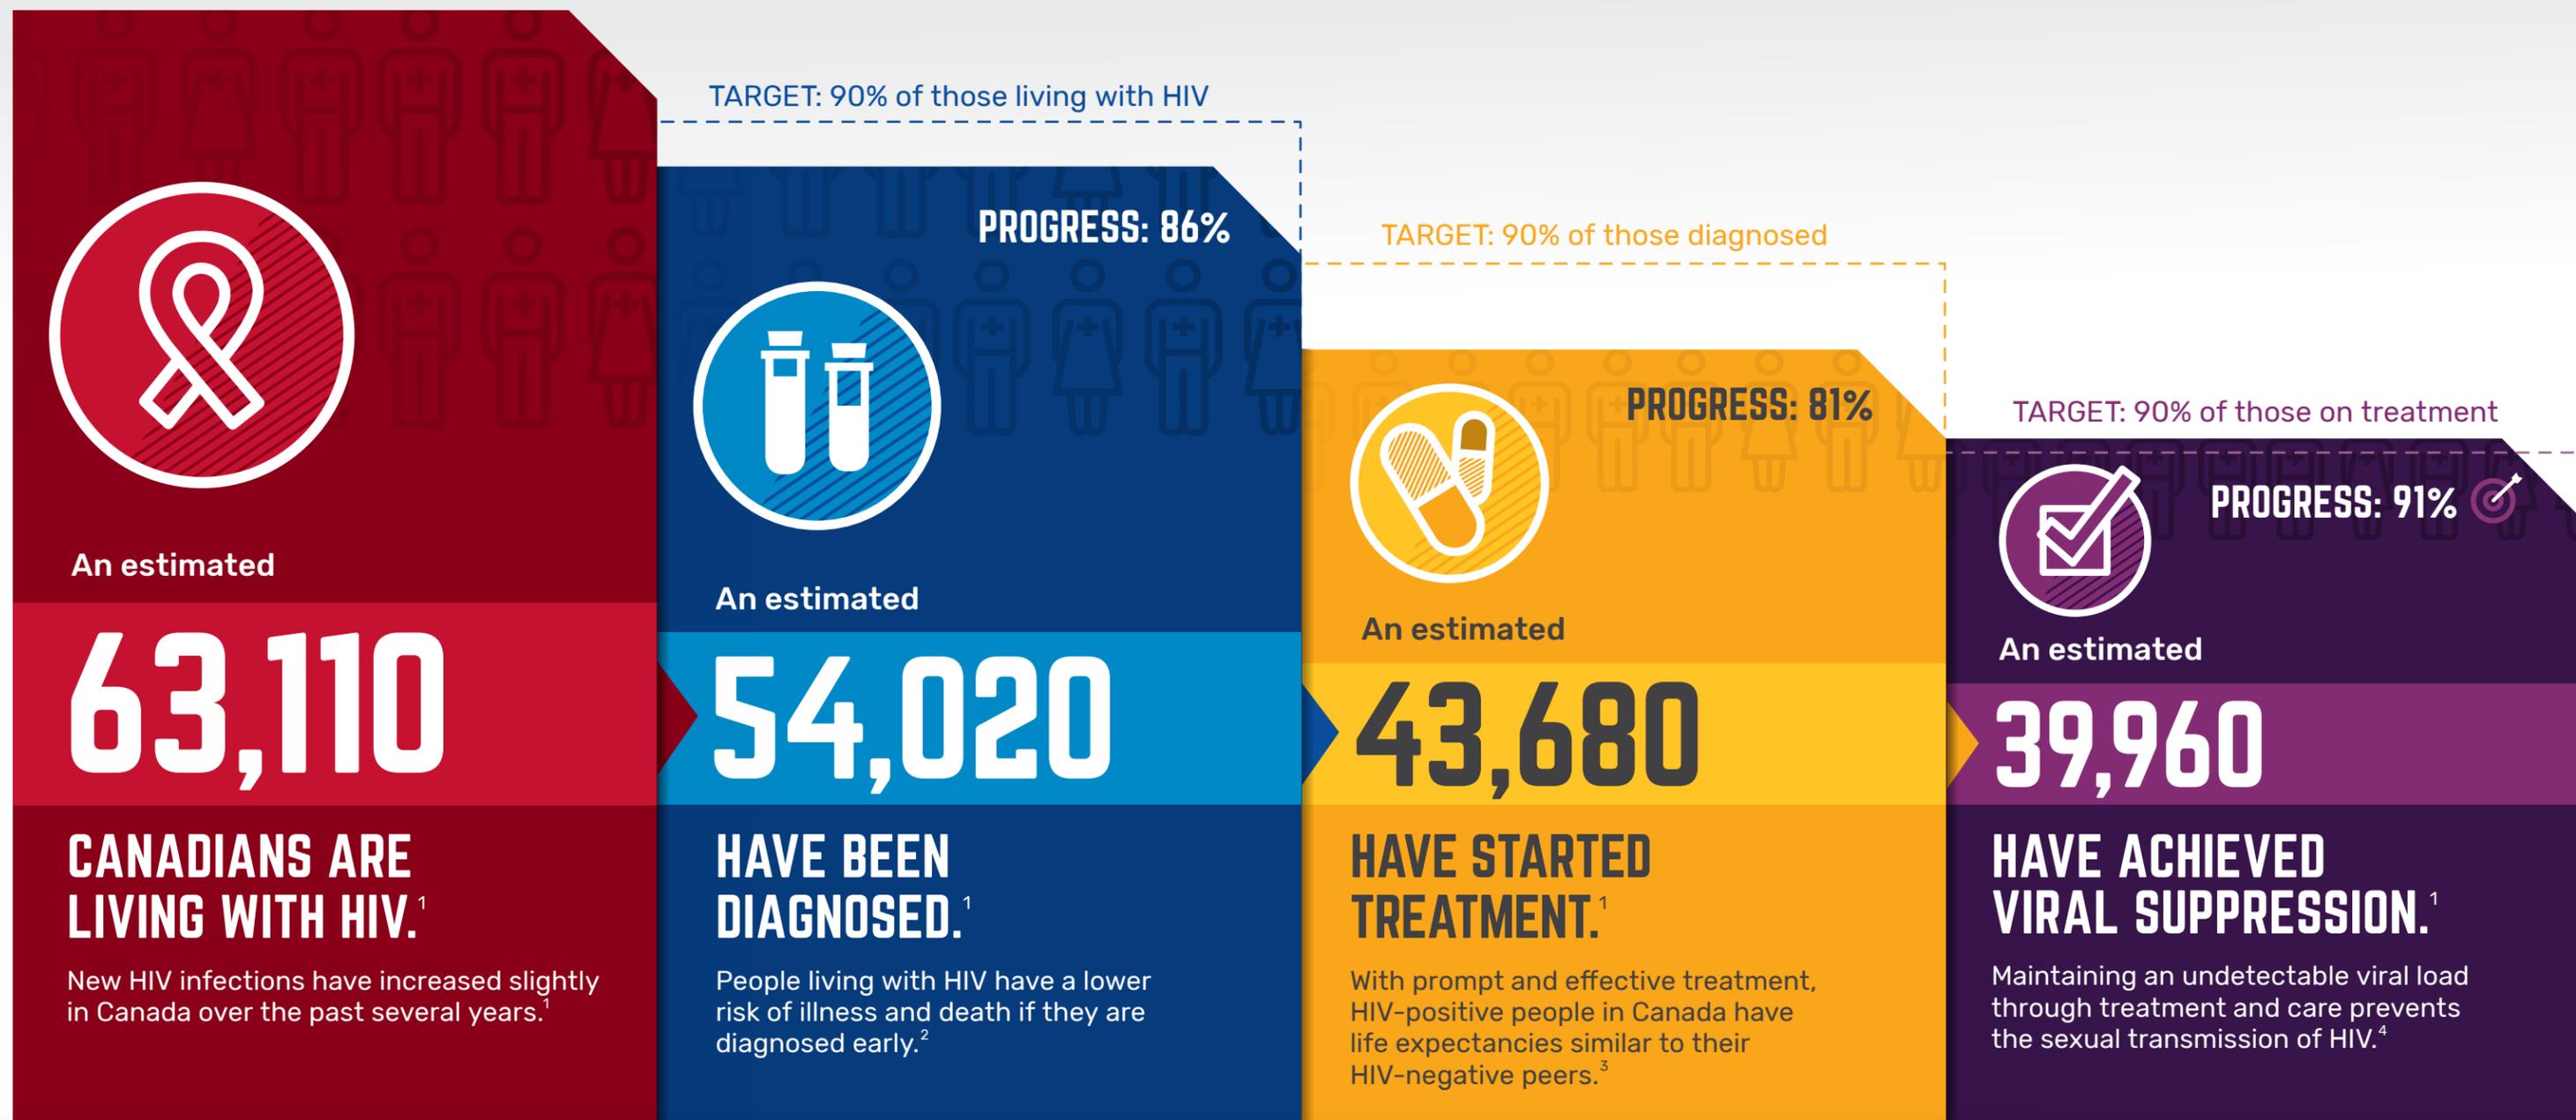

**90%** of people living with HIV diagnosed

**90%** of people diagnosed starting treatment

**90%** of people on treatment achieving viral suppression

**CATIE.CA**

It is projected that meeting these targets will end AIDS as a public health threat by 2030. This was the state of our progress at the end of 2016:

<sup>1</sup>2016 estimate from the Public Health Agency of Canada.
